DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 46-53 are rejected under 35 U.S.C. 102(b) as being anticipated by DeFelice et al. (U.S. Patent No. 6,190,940).

In claim 46, DeFelice disclose a method forming one or more conductive contact pads (22) in a first substrate (21), and forming dielectric over the one or more contact pads (23), with the dielectric having one or more openings (31) which overlie the contact pads and also overlie one or more regions adjacent to the contact pads (see figures 2-4, and column 5, lines 5-50).

In claim 47, DeFelice disclose a method wherein the regions adjacent to the contact pads are less solder wettable than the contact pads (see column 6, lines 33-60).

In claim 48, DeFelice disclose a method wherein the regions adjacent to the contact pads are dielectric regions (see column 6, lines 33-60).

In claim 49, DeFelice disclose a method placing solder paste (35) into the one or more openings (31) and heating the solder paste to melt the solder (see figures 5-7, and column 5, lines 37-50).

In claim 50, DeFelice disclose a method comprising soldering one or more contact pads (38) of the a second substrate (37) to the one or more contact pads (22) of

the first substrate with solder obtained from the solder paste (35) (see figure 8, and column 6, lines 24-60).

In claim 51, DeFelice disclose a method wherein the second substrate is a semiconductor integrated circuit (see column 6, lines 24-26).

In claim 52, DeFelice disclose a method wherein the first substrate is a semiconductor integrated circuit (see column 5, lines 5-8).

In claim 53, DeFelice disclose a method wherein the first substrate is an integrated circuit packaging substrate, which does not include a semiconductor substrate (see column 4, lines 35-39).
